DETAILED ACTION

Claims 24-28 are currently pending in the instant application, appear allowable over the prior art of record and have been renumbered as claims 1-5.

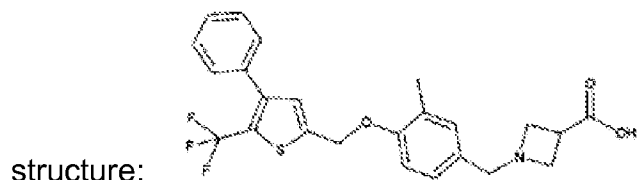

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Yong Zhao on 24 June 2008.

The application has been amended as follows:

1. Cancel claims 1, 2, 4-7, 9, 21, 22 and 34.
2. Amend claim 28 by adding the term "and" before the last listed compound

Reasons for Allowance

The following is an examiner's statement of reasons for allowance. This invention relates to products of the formula II. The novel and nonobvious aspect of this invention involves the nitrogen containing heteroring which is substituted in only two positions and which is substituted by a carboxyl group. The closest prior art of record, WO 01/38325, fails to teach or suggest applicants' instantly claimed invention. Applicants' agreement

Art Unit: 1626

to cancel claims 1, 2, 4-7, 9, 21 and 22 has overcome the 35 USC 103(a) rejection as claims 24-28 require either an azetidine or pyrrolidine ring in the position equivalent to the prior art ring B wherein the prior art ring B is preferably pyrrole, pyrazole and imidazole; require only two substituents wherein the prior art has three substituents as X1-R2 is preferably present and R2 is preferred to be phenyl, furyl or thienyl; and requires a direct substitution of the carboxyl group wherein the prior art prefers an indirect substitution of the (C=O)-R3 group. These differences present in the preferred embodiments along with the vast genus of compounds described in Takeda would not motivate one of skill in the art to select the particular alternatives out of the extremely large and complicated genus of Takeda to arrive at the present invention. Therefore, the instant claims 24-28 are not obvious over WO 01/38325 and WO 01/38325 fails to teach or suggest applicants' instantly claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
